74-423/A

4 FEB 1974

Vice Admiral M. G. Bayne, USN
Commandant
The National War College

Dear Admiral Bayne:

Thank you for your note of 18 January enclosing the fall 1973 issue of the National Security Affairs Forum. I agree that the new title of your journal better reflects its stature and its scope. I also commend the idea of devoting an entire issue to a central problem of major importance, in this case energy.

My associates and I look forward to receiving future copies of your publication. It symbolizes the extension of the range of the National War College's signal contribution to our government's total national security effort that has been carried out under your leadership.

Sincerely,

/s/ W. E. Colby
